

Class 1 Maths

Wednesday 13th January 2021

Today we are going to continue to explore the language of heavier and lighter but introduce balance scales so the children can start to experience how we measure weight.

Fun starter

Go on a number hunt! Hopefully you are all getting the chance to get outside for some daily exercise. When you are, see if you can spot numbers with your children when you are out and about: on doors, road signs, car number plates and the like. This will introduce your child to the concept that numbers can represent a value as well as a position in a sequence, or simply as a label (for example on a bus).

Activity

See my video. Can you have a go at making a balance scale?

Have fun!
