O LO: Can I begin to format my non-chronological report to ensure that it includes appropriate diagrams, titles, subheadings and accessible layout features?

In the lesson today, we are going to focus on how we can present our non-chronological reports. I have attached some layouts below that you can choose to write your non-chronological reports in if you wish. Only select one of them or create your own format to present your report. The green boxes are designed to include a picture with a caption or a diagram. The other boxes can include your text and your title.

Once you have chosen your design, it is up to you whether you type or write out your final draft in that template. It would be easier to type as it is easier to edit as you go, however, if that is not available to you, you are welcome to handwrite your final draft and draw your template.

Blank rectangular box at the top of the page.

Rectangular box with horizontal dashed lines for writing.

Rectangular box with horizontal dashed lines for writing.

Large empty rectangular box with a green border.
